The City can do either the first or second week in March. We will need one day during the first week of March to complete required OEPA monitoring of the distribution system.

Thanks,

Keshia

Sincerely,

Keshia L. Kinney

Available Dates: Need one Day for the Depth to Water snapshot.

Jim, collection of samples from City wells-CH can accommodate the City's schedule, independent of the depth measurements.

Ohio EPA: March 6, 7, 10, 11, 13, 14

City of Dayton: March 4th and 5th work best for us. The end of the week no so much so.

CH2M HILL: March 4 thru March 12. We can only work 10 days straight.

Based on above current options: March, 6, 7, 11 or 12.

Can the City fit in one of these days?

The field is narrowing.

Dave

I assume you are referring to the water level measurements, CORRECT?

Either day will work for HILL, need to know if it works for OEPA.

Jim, CH2M HILL can accommodate the sampling effort by the City the week of March 3rd.

We need to discuss the “date” for the water levels. Feb 28 and March 3, aren’t looking good due to scheduling conflicts and possible weather on March 3.

Per an email from Tammy earlier today, can the City assist with water levels after March 3rd. You have my cell number so call me anytime.

Thanks

Dave

Dave - Right now, we can do the water levels either on either the 28th or the 3rd and I think the week of the 3rd works for sampling. Just need to know soon. Also, please include Keshia on the following e-mails as I am stuck in meetings today and you will want to work with her for the "MW" well sampling. Depending on the day, I may have to include assistance from our consultants so they will need to know as well.

Thanks. Hey, I appreciate the scheduling nightmare you're going through.

Jim

Subject: RE: Late Winter Regional GW Snapshot-Behr Dayton VOC Plume Site

The City of Dayton folks can't do Feb 28th. March 3rd may present other difficulties. I have a call into Jim Shoemaker to discuss and also would like to discuss with you.

We would like to complete the depth to GW snapshot in a single day. After March 3rd may work better as CH will have 5 to 6 people available for at least an 8 day period.

CH2M HILL will be sampling March 3-March 13 and March 18-March 25.

I have attached two spreadsheets. "Table 1 Well and Sample Table" and "Behr Site Wells GW Snapshot June 27 2013oepea".

Table 1 lists the wells that I know we need OEPAs help to access (yellow highlights), there may be other wells in the DAP Janney Road or Commerce Park area that we may also need OEPAs assistance to access as I am not certain who controls access to these wells. CH2M HILL can perform the sampling.

The second table lists the wells that OPEA (you and Greg Brown) gauged during the 2013 Snapshot. Bill Batin also gauged wells but he gave me a hard copy which I will forward to you shortly.

I am working from my home office today and tomorrow, available via email or my cell 272-6559

Thanks

Dave

Greg Brown and I can help out. Bill and Tori are out of the office today. Unless something has changed since I talked to them last, they can't help on the 3rd. They changed to lock on the wells at EPS so we are working on getting new keys. Simclar won't give us keys so I will set it up to meet with their representative on the day we sample. Are there any OEPA properties I need to get permission for? Randy set this up last year, so I want to make sure I'm not missing anything.

Still planning on Friday Feb 28 or on Monday March 3rd.

Are OEPA and the City still available these days? The well list will be basically the same as the last event. A new spreadsheet is being finalized.

Thanks

Dave

Thanks Jim.

We are analyzing for VOCs only (8260). I am trying to pin down the day and will make every attempt to fit it into Feb. 28, March 3rd or 4th. OEPA (Bill Batin/Tori Sigler) are not available the week of the 3rd but are available the last week of February so if they are going to assist we may be able to gauge Feb. 28th. Need to confirm Terran's availability-working on that now.

We need the splits from the early warning MW wells. We can sample the "other City wells" we will just need access.

I will keep you posted.

Thanks

Dave

Dave,

We are on board here. However, a few questions from our Water Supply & Treatment lab & sampling folks. Are you sampling for more than just VOCs (8260 or 524.2) in City wells? We will do our end-of-month water levels on Feb. 28th but can postpone to March 3rd or 4th (at the latest) if you can nail down one of these 2 days. Also we would accommodate sampling by providing splits from our early warning wells (wells with an "MW" designation). For the other City wells you are welcome to sample on your own.

Jim

I believe that since we have been in the BIG CHILL for weeks all of us may have a little cabin fever and need to get back outdoors. So to revitalize us what would be better than a regional GW snapshot event and a major groundwater sampling event the first of March?

USEPA is planning another major sampling event of up to 250 wells within the area shown on the attached figure for the first week of March 2014. As in the past and if possible we are requesting assistance from OEPA and the City of Dayton.

Will you be able to assist? The snapshot will be a one day event. CH2M HILL will be sampling over a 2-3 weeks period and we would like to obtain GW samples from City wells, OEPA wells and possibly other wells (some west of I-75 and Simclar wells).

I wanted to get this on the radar. We can discuss further.

Thanks

Dave
